Universidad de Sevilla, Spain

Languages

- **English C1** TOEFL iBT TEST
- **Italian B2**
- **Spanish Native**

Profile

Entry level Front End Developer from Nucamp Coding Bootcamp based in Milan, Italy. My goal is to work remotely with an English, Italian or Spanish speaking team, but don't really have a problem with relocation. I would love to find a position as a React developer with opportunities to grow and learn.

Projects and Skills

•Argos Pets: Simple Scrolling FX project that was created for the Bootstrap Course of the Bootcamp. Designed to be responsive and animated, I added the Animate on Scroll Library in order to create a more dynamic UI.

•Portfolio Website: It was designed and coded by me using React, Reactstrap and React Animations Components with dynamic animation styles.

•UI Prototypes: Design projects using Adobe XD, Photoshop and After Effects in order to learn the principles of Web Design.

Work Experience

Content Manager | CCDO E-Learning   03/2020 to 10/2020
Responsible for editing, deciding and constructing audiovisual content for E-learning courses.

Video Editor | ALMA Observatory   03/2019 to 01/2020
Videos for Instagram about astronomical concepts and milestones of the observatory. Video montage, post-production, and script editing for science topics were some of the tasks.

TV Host | Crack Económico   06/ 2018
I was in charge of hosting and creating the script for a tv pilot show on digital economy.
